Office Memorandum • UNITED STATES GOVERNMENT

TO : Assistant Director, Reports and Estimates

DATE: 24 November 1948

FROM : Chief, Plans and Policy Staff

SUBJECT: Review of ORE Personnel Increase in Apposition to Intelligence Production

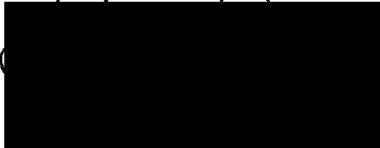

1. Pursuant to your verbal instructions, a task force of P&PS has been working on the analytical aspects of subject.

2. The extensive research required, in addition to the necessity for attempting to translate intangibles and qualitative assessments into evaluational terms has proved a tremendous undertaking. It now appears that a considerably longer period of time will be needed.

3. Meanwhile it is believed that certain of the data being collected and collated by "Task Force 15%" may prove of immediate interest to you, particularly in the event that you may wish to have certain factors pursued in more detail. Accordingly there is forwarded herewith one copy of the "15% Folio" for your inspection.

4. It is suggested that you may wish to have your secretary hold this folio, in which case we will forward to her, as prepared, a copy of each important working paper.

5. Among major current contributory investigations, there are presently in preparation by ORE components consolidated statistical reviews of their respective productions and related time-consuming responsibilities for the significant period. When these, as well as several other materials are received and analyzed, P&PS will submit a staff study, complete with recommendations.

Conferences

1. The participation in conferences by professional personnel of ORE has increased materially due to the inception and implementation of several interdepartmental programs, the interdepartmental exploration of certain fields, and the broadening of services to certain agencies. Included are:

- NSC-4 Program
- World Communism Program
- BW Committee
- Scientific Ordnance Committee
- Clandestine Air Operation
- Intelligence Support of ECA

2. For the most part, the above activities do not require the production of substantive intelligence but it must be recognized that, in addition to the actual amount of professional time consumed in attendance at conferences, CIA prestige and efficient contribution to conferential problems necessitates the expenditure of material amounts of professional time for research preparation.
